EDUCATION

University of California, Santa Cruz

Graduated March 2025

B.S. Computer Science, 3.77 GPA, Honors in the Major

09/2021 - 03/2025

Relevant Coursework: Intro to Software Engineering, Software Design Project, Web Applications, Data Structures and Algorithms, Machine Learning Basics, Computer Architecture

CERTIFICATIONS

- **IBM AI Product Manager Professional Certificate** – Coursera (In Progress, Expected March 2026)
- **AWS Generative AI Applications Professional Certificate** – Coursera (In Progress, Expected March 2026)
- **Machine Learning in Python Environment** – Alison (February 2026)

PROJECTS & EXPERIENCE

Impact of Generative AI on the Stock Market

HTML, JavaScript, Python, Claude API

Product Owner/Full-Stack Engineer

Jan. 2025 - Jun. 2025

- Led AI trading strategy design and development, enhancing user engagement and market analysis capabilities
- Engineered a dynamic frontend prototype that improved user interaction and streamlined trading processes
- Developed rule-based trading bots, simulating realistic market behavior and optimizing trading performance
- Implemented automated trade execution using prompt-engineered LLMs, increasing strategy execution efficiency

Trading Card Game Tracker

JavaScript, React, Python, HTML, CSS

Product Owner/Full-Stack Engineer

Sept. 2024 - Dec. 2024

- Designed a user-friendly card detail page that improved clarity and usability for card valuation
- Engineered a profit calculation feature, enabling users to estimate card values and optimize grading costs
- Implemented dynamic functionality for collection management, enhancing user experience and engagement

Bird Watching App

JavaScript, Python, HTML, Py4web

Full-Stack Engineer

Dec. 2024

- Developed interactive checklist pages enabling users to create, view, edit, and delete personalized birdwatching logs
- Integrated a dynamic map that displays species lists based on real-time latitude and longitude input
- Built a filtered form with auto-filled date and time and species count inputs to streamline data entry
- Connected frontend and backend systems to ensure persistent checklist data with secure, user-specific access

First-Person Exploration Application

JavaScript, Three.js, WebGL

Independent Developer

Mar. 2025

- Built a 3D park scene with 3D models and textured primary shapes
- Implemented orbit camera controls for smooth first-person navigation
- Applied directional, hemisphere, and point lighting for realistic illumination
- Enhanced rendering with fog, dynamic shadows, glowing firefly sprites, and a textured skybox

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, HTML, CSS, SQL, TypeScript, C, C++
- Frameworks and Libraries: React.js, Node.js, Bootstrap
- Web Tools: Git, Docker, Firebase, Valkey/Redis, Figma, LaTeX
- AI Tools / LLMs: Claude, ChatGPT, Gemini, Prompt Engineering
- Project management: Jira, Agile (Scrum)

WORK EXPERIENCE

Target, San Jose

Jun. 2024 - Jul. 2025

Guest Advocate

- Supported order fulfillment and front-end operations while strengthening communication, time management, and adaptability to new responsibilities in a fast-paced environment

Poke House, Santa Cruz

Feb. 2022 – Oct. 2022

Team Member

- Prepared for opening, assembled food items, provided customer service, and reset after closing
